

Carsiotis, M. and A. Lacy. Tryptophan synthetase levels in hist-1 mutants.

401 (1952)). The equivalent mutant of S. typhimurium has been found to produce normal levels of tryptophan synthetase.

Mutant C-84 (hist-1) of N. crassa produces elevated levels of tryptophan synthetase (Hogness and Mitchell, J. Gen. Microbiol. 11, 401 (1952)).
